

Biologically Active Compounds in Food 2019

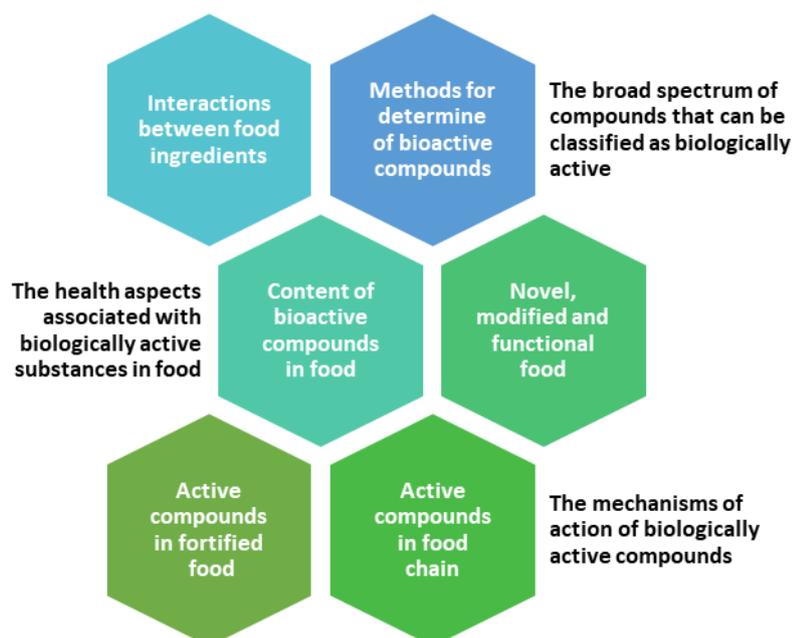

3rd International Conference

September 19 & 20 - Łódź, Poland

BACIF 2019 - Conference Invitation

The research on biologically active compounds of food is still very important in today's science. Researchers on one site, food consumers on the other and nutritionists in between, they all are interested in food safety and quality, and that largely depends on components of biological activity.

The importance of biologically active compounds in food is the first reason for third edition of BACIF. The second reason is the success of two previous editions in 2015 and 2017. As previously the conference aims to be a modern and interdisciplinary debate platform for the specialists dealing with various aspects of biologically active substances in food products. The conference is to be held in the city of Łódź, just in the centre of Poland, this time in September at Lodz University of Technology.

Online registration

Find out more on:

<http://bacif2019.p.lodz.pl>

Important dates:

- Registration open February 1st 2019
- Closing the early-bird registration – April 15th 2019
- Registration close July 31st 2019
- Deadline for payments – August 10th 2019
- Deadline for abstract submission – August 10th 2019
- Conference BACIF 2019 – September 19th and 20th

Participation fees:
